Crane®
PERFORMANCE SIDING

N O - N O N S E N S E

SOLID CORE SIDING® offers a complete exterior siding system combining superior energy efficiency with durable, long-lasting beauty. Its tough Vycralar™ surface is bonded with SOLID CORE™ backing, creating a product with unmatched bridge strength, superior R-Values and air infiltration ratings, and guaranteed impact resistance. These exceptional qualities allow SOLID CORE SIDING to be backed by the industry's only **No-Nonsense Life of the Home Warranty**.

The manufacturer warrants to the homeowner that SOLID CORE SIDING will not peel, blister, pit, flake or corrode as a result of manufacturing defects or as a result of exposure to ocean air (salt spray). Unlike conventional veneer-type sidings, which are warranted only to the initial homeowner, SOLID CORE SIDING is warranted for the lifetime of the house — the period for which the structural integrity of the house remains intact.

In order to transfer this warranty, the new homeowner can simply return the enclosed transfer card within 30 days of the transfer of ownership of the house.

In the case of "commercial" installations — such as apartment buildings, condominiums, etc. — the period of warranty coverage shall be 60 years.
